DORA Help Page

Welcome to the help page of DORA. We hope you can find all answers to your questions here. If not – don't hesitate to contact us by e-mail (dora@lib4ri.ch). We are more than happy to be of any support to you!

What is DORA?

DORA is the digital repository and bibliography for all research articles and other publications affiliated with the four research institutes within the ETH-Domain and hosted by the Lib4RI:

- Eawag
- Empa
- PSI
- WSL

As such, all included publications are authored, edited, published by one of the four research institutes, its members, or organizational units. For PSI, the publications resulting from research performed at the PSI laboratories are archived in DORA as well. DORA shares the publications with the public, following copyright rules.

DORA offers:

- availability of full texts either for internal users or public
- simple possibilities for search, filter and export
- interfaces for the automated retrieval of data

For every research institute a separate DORA-instance exists, which manages the publications of the institute. You can reach each of the instances from the shared main site: www.dora.lib4ri.ch

How can I submit my publication to DORA?

Please choose if you're from the PSI or the Eawag, Empa, WSL institute.

DORA PSI, the new Institutional Repository - Presentation

Download the slides to the DORA PSI Info Event, which took place on 3 June 2019.
